Group 13: Connor Fitzmaurice, Dustin Hengel, Mercy Housh,
Madison Williams, Bradley Worthen

Data for this web application will be collected straight from the user - a user will have to follow the steps mentioned in User Documentation to either add a review for a housing complex that is already listed on the website, or a user can select the option to add a review for a housing complex that is not already listed. This inputted data will then be stored in the database for future use of additional functionality.

As of right now, mock data has been placed into the database to ensure our application is working as designed for the first demonstration.
